

Do you get your steps in with inefficient fax and document management?

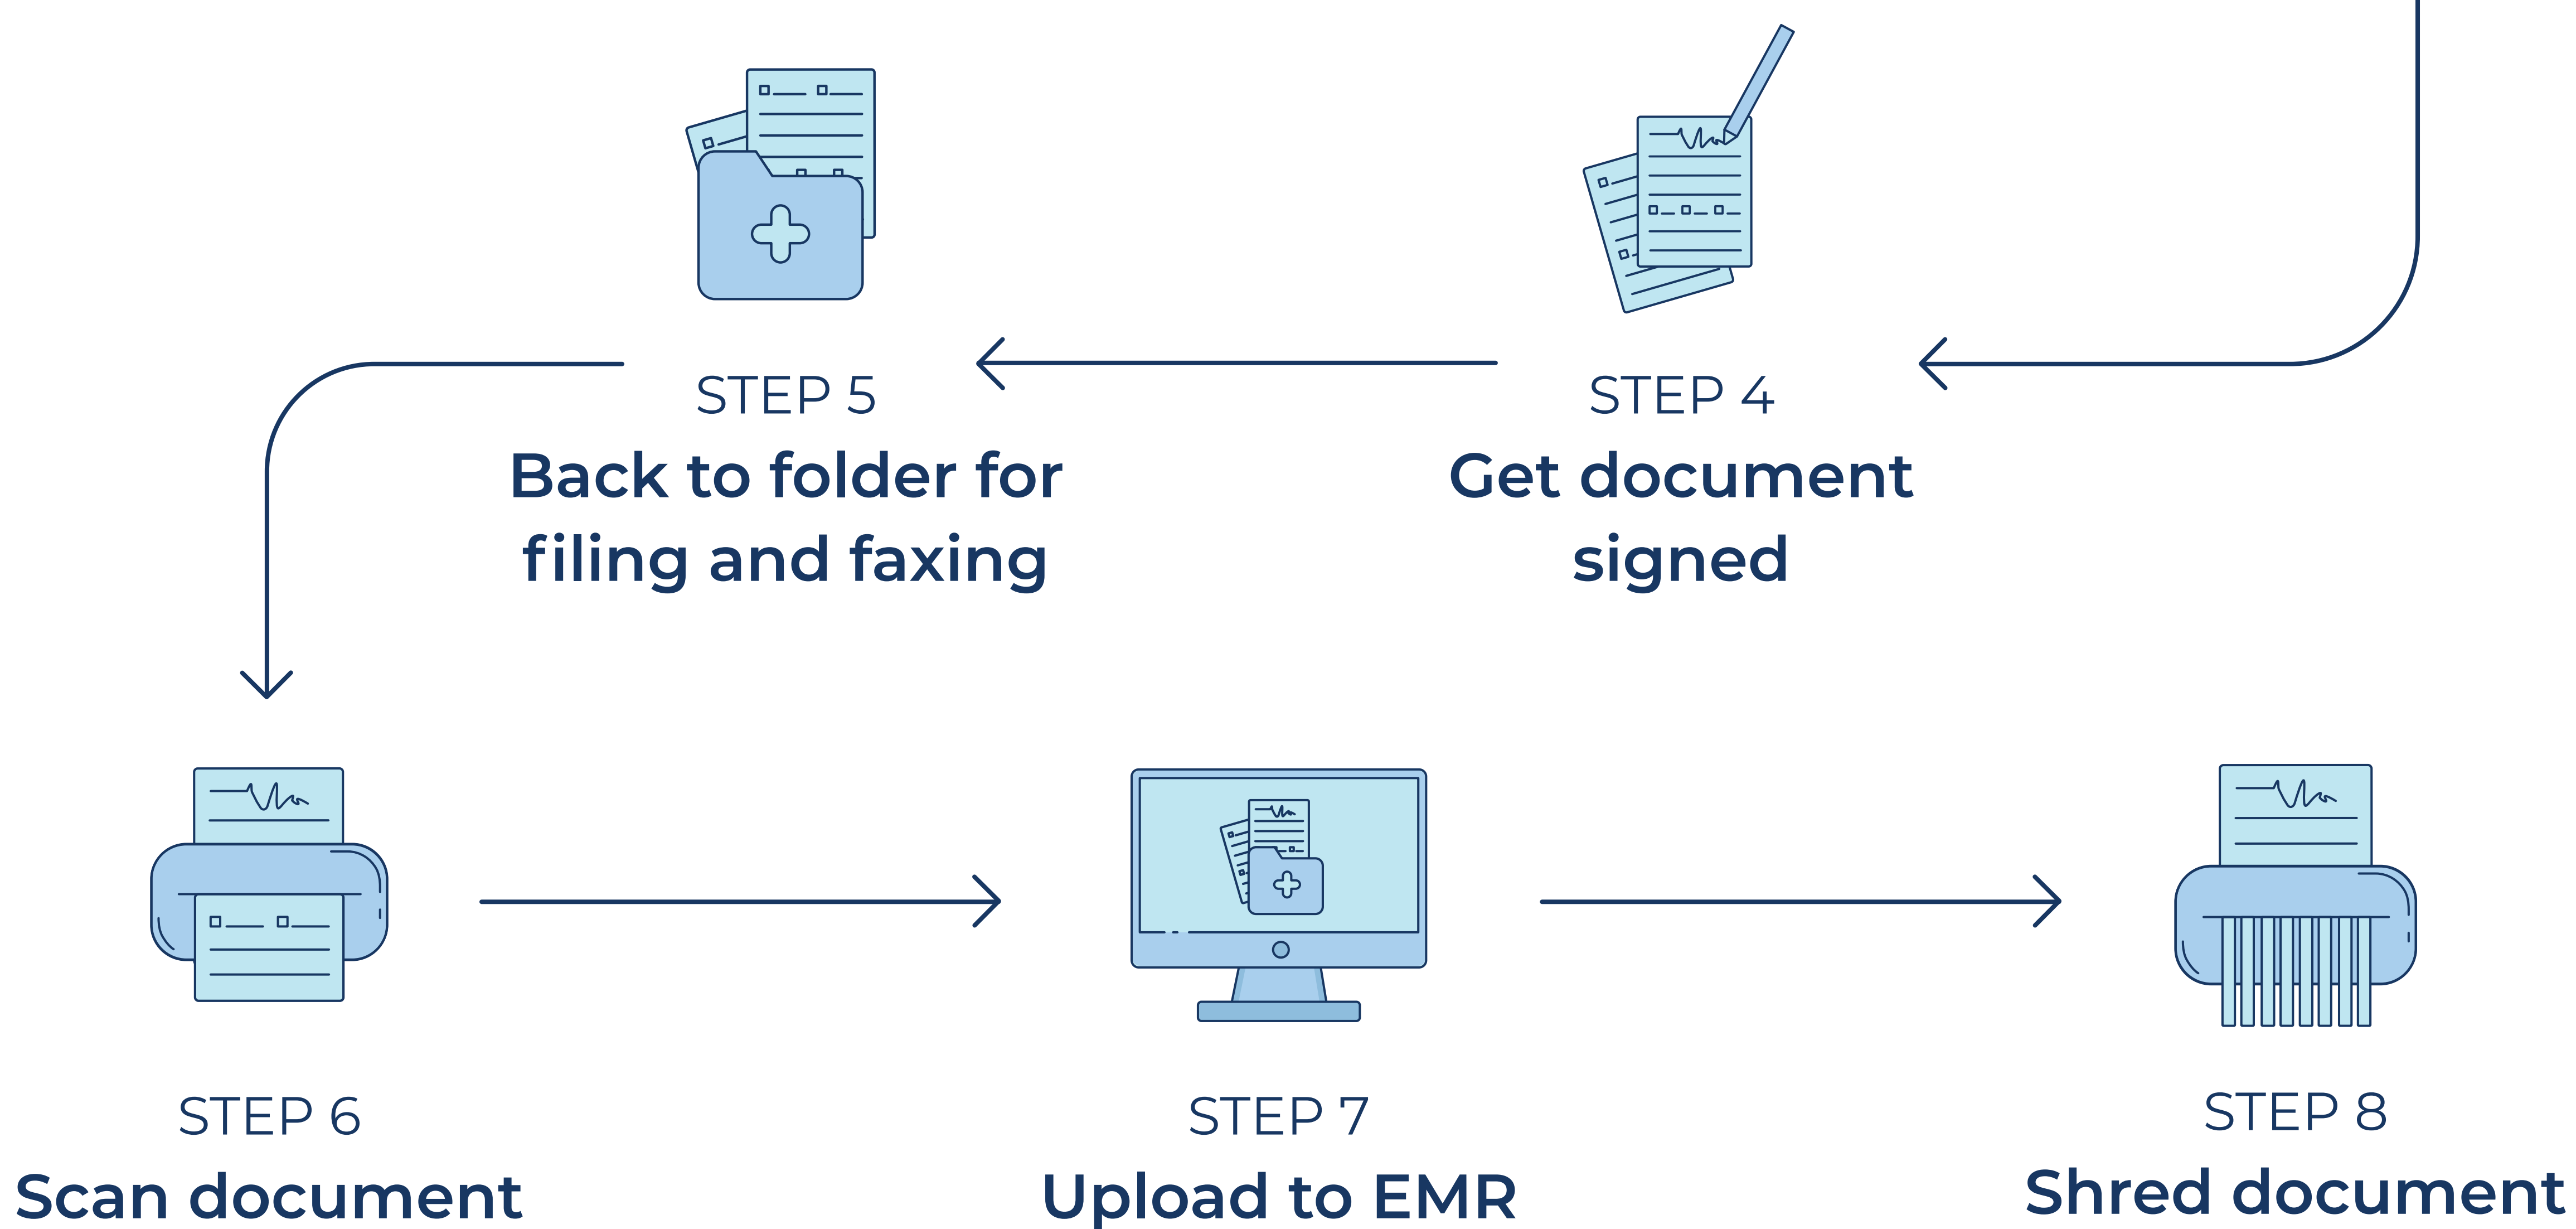

According to a report in Becker's Hospital Review, it is estimated that **fax machines account for 75% of all medical communications.**¹ With Updox Electronic Fax, see how easy it is to seamlessly transition from traditional fax machines and servers.

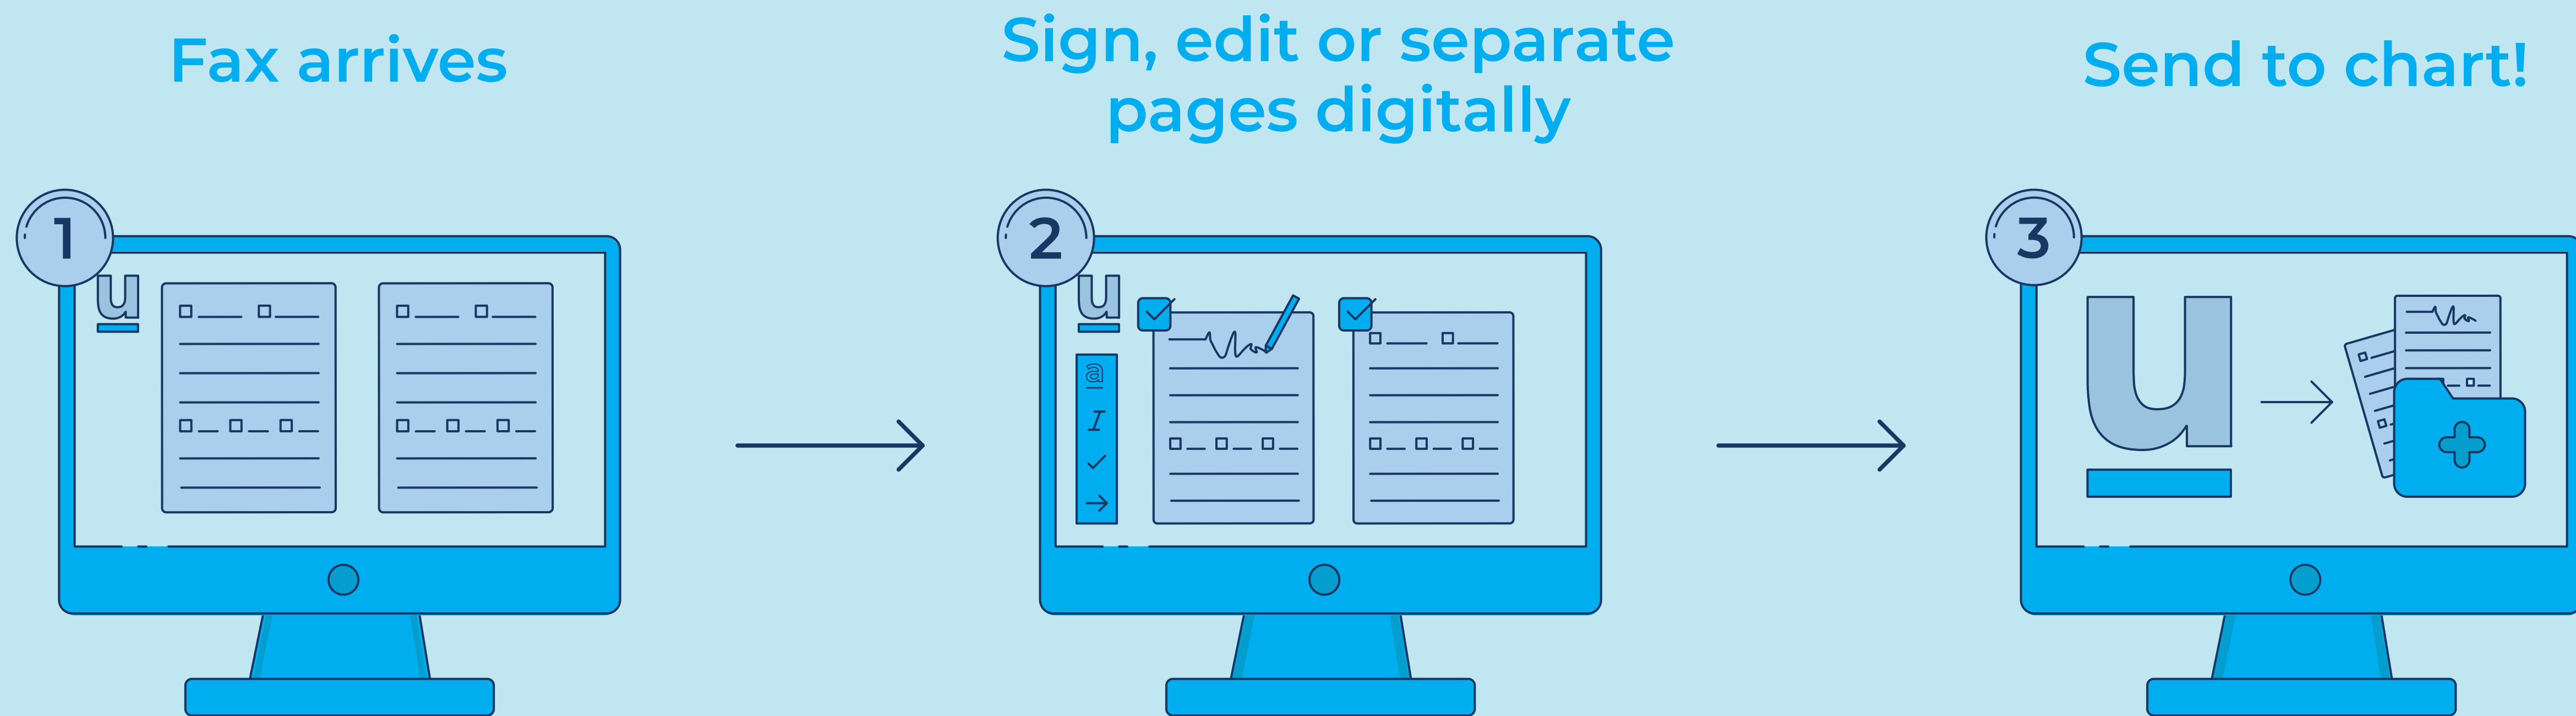

Traditional faxing costs your healthcare organization time and money

THE AVERAGE HEALTHCARE ORGANIZATION SPENDS:

- \$250 billion to process 30 billion healthcare transactions each year (15 billion are faxes)
- \$120 in labor searching for each misfiled document
- \$220 for the recreation of a document

Updox is 3 simple and reliable steps

Electronic Fax is a product within the Updox Communication solution which connects providers to other providers and care team members from the same application where they're already easily connecting with patients. By consolidating provider and patient workflows into a single Customer Relationship Management (CRM) platform, we give you one place to manage all external communications and patient engagement. Our approach helps healthcare providers lower costs, improve staff productivity, strengthen patient relationships, and optimize workflow through a secure, easy-to-use platform that can grow with your business.
