

# Do you get your steps in with inefficient fax and document management?

On average, medical practices and pharmacies still use more than **1,200 pieces of paper a month** by old-fashioned fax or through hardware solutions. See how easy **Electronic Fax is with Updox**.

**Traditional faxing costs your practice time and money**

THE TYPICAL PRACTICE SPENDS:  
 \$80 per month on toner  
 \$30 per month on a fax line  
 \$25 per month on paper  
 \$50 per month for shredding  
 4 minutes per fax in staff time

## Updox is 3 simple and reliable steps

Electronic Fax is a product within the Updox Communication solution which connects providers to other providers and care team members from the same application where they're already easily connecting with patients. By consolidating provider and patient workflows into a single Customer Relationship Management (CRM) platform, we give you one place to manage all external communications and patient engagement. Our approach helps healthcare providers lower costs, improve staff productivity, strengthen patient relationships, and optimize workflow through a secure, easy-to-use platform that can grow with your business.
